Abstract

National efforts by CLARIN-IT
• a survey aligned with the principles behind CLARIN-ERIC and CLARIN
• User Engagement
• Contributions to the impact of CLARIN on Digital Classics

Profiling Ancient Greek Scholars in Italy

National efforts by CLARIN-IT
• a survey aligned with the principles behind CLARIN-ERIC and CLARIN
• User Engagement
• Contributions to the impact of CLARIN on Digital Classics

Who: The fields
- Greek
- Classical Philology
- Latin
- Middle Ages

Why
- evaluate the impact of Digital Technologies within the community of Ancient Greek Scholars in Italy
- test new opportunities offered by Digital Humanities about knowledge and quality in transmission of ancient texts

How
- assess the use of digital resources and technology with respect to work in Ancient Greek scholarship
- identify the key factors which are likely to constrain its use and elicit needs and requirements and expectations

The Survey

The Survey

Data analysis

Survey vs CLARIN

- can significantly help improving the survey
- provides users with a variety of analysis tools ready to be used/easy to be adapted for processing their data
- can indeed provide significant developments in the field of Digital Classics
- provide, through centres and VLO, data and tools which are ready to be used for processing the data

Quantitative Evaluation of Functions

<table>
<thead>
<tr>
<th>Functions</th>
